GODRIC G. **RAMELO**

Subic, Zambales, Philippines godricramelo@gmail.com +63 927-179-0706

SUMMARY

Bachelor of Science in Information Technology student (expected graduation 2027) with hands-on technical support and data processing experience from on-the-job training at Olongapo City Hall, plus academic exposure to PC troubleshooting, networking, and system administration. Built web applications using React, Next.js, and Firebase, with AI-assisted development as part of my workflow. Seeking an entry-level IT support or technology specialist role where I can apply my skills, learn from experienced teams, and keep growing.

TECHNICAL SKILLS & TOOLS

- **Technical Support:** User assistance, troubleshooting, system navigation support, data encoding, record management
- **Programming & Web:** JavaScript, TypeScript, PHP, HTML, CSS, React, Next.js, Angular, Tailwind CSS
- **Databases & APIs:** Firebase Firestore, MySQL, MongoDB, REST APIs, Postman, CRUD operations, authentication
- **Tools & Platforms:** Git, GitHub, Visual Studio Code, XAMPP, Vercel, Browser Developer Tools, Figma, Canva
- **Productivity Software:** Microsoft Word, Excel, PowerPoint, Google Docs, Google Sheets
- **AI-Assisted Development:** Prompting, reviewing, debugging, and customizing AI-generated code

EXPERIENCE

Data Encoder/Technical Support/UI Designer (On-the-Job Training) **February 2026 - May 2026**

Olongapo City Hall - LEDIPO BPLO | Olongapo City, Zambales, Philippines

- Encoded applicant data and processed application information across multiple digital systems to support permit application processing and record organization.
- Assisted clients with system navigation and application-related tasks to help them complete permitting procedures.
- Contributed to the user interface design for the mobile adaptation of the web-based permitting system, focusing on usability and accessibility across mobile devices.

PROJECTS

SideScroll – Simple Blog Web Application | Angular, PHP, MySQL

- Developed a blog web application implementing CRUD operations, authentication, and content management features.
- Customized and debugged AI-assisted code to meet project requirements.
- Strengthened understanding of frontend–backend interaction and database integration.

FoodHub – Web-Based Recipe Management | Angular, PHP, MySQL

- Developed a web-based recipe management application using Angular, PHP, and MySQL, implementing CRUD functionality and a responsive user interface.
- Explored OAuth authentication and role-based access control concepts through project development.
- Gained hands-on experience in system integration and cross-component compatibility.

MedicaOne – Healthcare Management System | Next.js, React, Firebase Firestore, Tailwind CSS

- Developed a web-based healthcare management system focused on patient management and digital prescription workflows.
- Gained hands-on experience in data-management workflows while exploring caching, data persistence, React Query, and centralized data validation.
- Explored Progressive Web App (PWA) concepts and modern frontend frameworks alongside cloud-based database technologies.

EDUCATION

Bachelor of Science in Information Technology Expected Graduation - 2027

Gordon College | Olongapo City

Relevant coursework with hands-on lab exposure: Object-Oriented Programming, Fundamentals of Database Systems, Introduction to Human-Computer Interaction, Networking, System Administration and Maintenance, PC Troubleshooting with Basic Electronics

Introduced to: Windows installation and configuration, PC hardware diagnosis, network cabling and IP addressing, basic network setup, user account management, Microsoft 365
